Help protect your business against threats

CYNTHETIC
SYSTEMS

Enterprise-level cybersecurity for small business.

- Robust advanced threat intelligence

- Real-time threat detection management and response

- Distinct threat recognition-only credible, high priority threats

- Data analytics that go beyond rules and analysis from other external engines

- Identification of zero-day threats and anomalies

- Continuous learning about normal network activities

- 24/7 AI monitoring and management

- Proactive automated and human interactive resolutions

- Organization-wide situational visibility

- Adaptive and comprehensive visualization

- Powerful compliance reporting

- Customizable alert and remediation policies

Affordable, advanced cybersecurity
designed for SMB's.
Predictable monthly pricing.

Help protect your business against threats

CYNTHETIC
SYSTEMS

Fact: 81% of SMBs don't have a
dedicated IT team or relevant
security personel to address
security challenges or painpoints.

82% of businesses underestimate their risk and don't believe they are a target.

Do you have a sense of security or real cybersecurity?

PROACTIVE THREAT DETECTION

- Dynamic threat engines

- Deep machine learning and
  artificial intelligence (AI) based algorithm

- Zero-day, zero-trust models

COMPLIANCE ANALYTICS & REPORTING

- Reports for regulatory compliance
  (HIPAA, PCI, NIST, etc.)

- Security operation and investigation support

- Long-term data analytics

COMPREHENSIVE VISIBILITY

- Ingests raw streaming data
  executing millions of computations

- Logically auto-discovers and creates asset groups

- Works transparently with encrypted traffic

CONTAINMENT & ELIMINATION

- Auto-remediation of threats in real-time

- Provides clear, actionable steps to help
  eliminate threats

- SOC productivity improvement

- Reduces dwell time of zero-day threats

CONCLUSION

Running a small business requires dealing with an immense number of issues from competition to scheduling, payroll, banking and collections and the new one: supply chain issues. However, once you add security challenges to all of the above, it is just too much to handle: No Security Experts on staff, having to monitor security issues 24/7, compliance reporting requirements, and the desire and goal to have security as a competitive differentiator. All SMB assets must secured with appropriate security controls. By ad-dressing the "Zero Trust" principle, SMB's don't have to worry about the lack of administrative resources on remote locations, patching and upgrades, the layered approach and portable devices. Cynthetic Systems SMB Security Suite enforces access control, prevents attacks and threats, and protects business data, all while providing insight and visibility. It's easy, fast, agile, and effective. Lear more about how to use Cynthetic Systems SMB Security Suite to address these challenges with the best ROI (Return on Investment) and a low TCO (Total Cost of Ownership).

Customized solutions
Every network is different. Our security engineers will assess your needs
in a 1:1 consultation and design a custom firewall configuration for your unique needs.

"We differentiate ourselves from other MSPs by giving complete, best-in-class, SMB security by using the SMB Security Suite products"
— Greg Tanner CEO Cynthetic Systems
