

Next level leading prevention-first MDR/MPR solution.

CS Signature - Align cyber security with business objectives.

Why would a business use CS Signature?

1. Lack of resources (Money, People, Time)
2. Need help responding to your customers' or partners' security assessment questionnaires.
3. Prove your adherence to a customer's (or prospect's) compliance demands.

Now you can get access to advanced cybersecurity without having to build up the tools and team to manage it internally.

Focused administration.
Engaged for usability and performance issues.
Aligned security with data protection.

We are your dedicated accountable and responsible third-party for cyber security and privacy.

CS Signature manages, applies, and grows technology for your business. As an essential expert we help our clients reduce complexity.

When you invest in a virtual cybersecurity team for your company, you can feel confident that your sensitive data is protected against threats — but that's not the only advantage of hiring our virtual cybersecurity team:

- Lower cost than hiring a full-time cybersecurity professional.
- Zero limitations on resources, tools, and technologies — and which ones will best complement your IT toolbox.
- Expertise on security strategies, regulations, and topics.
- Scalability, we work with businesses small and large.
- Indefinite Terms means we can work with you as need us.

Organizations that partner with CS Signature have a reliable team who stands by their side to defend against the worst types of threats.

By partnering with Cynthetic Systems, you can benefit from the following:

1. Focus on Core Business.
2. Cost Efficiency.
3. Access to Expertise.
4. Proactive Monitoring and Support.
5. Scalability and Flexibility.
6. Enhanced Security and Compliance.

Next level leading prevention-first MDR/MPR solution.

Support & Maintenance

We provide continuous assistance and proactive updates to ensure your technology is performing at its peak level.

CheckPoint Endpoint Security

Harmony Endpoint is a complete endpoint security solution built to protect the workforce from today's complex threat landscape. It prevents the most imminent threats to the endpoint such as ransomware, phishing, or drive-by malware, while quickly minimizing breach impact with autonomous detection and response.

This way, your organization gets all the endpoint protection it needs, at the quality it deserves, in a single, efficient, and cost-effective solution.

CheckPoint Email & Collaboration Security

- *Anti-Phishing for incoming and internal emails*
- *Complete known malware and zero-day malware prevention (Sandboxing)*
- *Attachment sanitization (CDR, Threat Extraction)*
- *Malicious URL protection (URL Protection)*
- *URL Click-Time Protection (URL Re-writing)*
- *Data Loss Prevention (DLP)*
- *Account takeover prevention (Anomalies)*
- *Unauthorized applications detection (Shadow IT)*
- *Collaboration Applications Security:*
- *Complete known malware and zero-day malware prevention (Sandboxing)*
- *Malicious URL prevention (URL Protection) for messages and files*
- *Data Loss Prevention (DLP) for messages and files*

Unlimited Cloud Backups

Unlimited Remote Support

Day-to-Day Services Included in Remote Support

- Cyber Security
- User Support (“How do I...” or “This isn’t working”)
- Desktop/Laptop Installation and Management
- Network Security / Management
- Mobile Device Support
- Cloud Services
- Software Updates
- Remote Management / Monitoring
- Data Back-Up, Management and Maintenance

Next level leading prevention-first MDR/MPR solution.

Prevention-First

Best practices to improve defenses and prevent future attacks

Simplicity

24x7x365 service by our elite experts

Elevate Security

Advanced threat prevention powered by AI-based analytics

One Solution

Prevent, monitor, detect, investigate, and remediate attacks

Optimized Prevention: End-to-End Proactive Security Operations

- We monitor your entire IT infrastructure 24x7x365 to accurately detect real attacks across network, endpoints, email, cloud, mobile, and IoT.
- We prevent attacks from spreading in your organization by embedded prevention first approach in MDR, both prevention configurations and recommendations.
- We perform in-depth incident investigations and proactively hunt for threats using the industry's most powerful threat intelligence, AI analytics tools, and Mitre Att&ck.
- We continually make threat prevention better through ongoing AI updates.
- We rapidly respond to real threats, using orchestrated responses with automated playbooks to remediate your environment and improve defenses to prevent future attacks.
